

AXPONA 2018 MEDIA ALERT

Caprice Audio to Debut Its New Mosaic Reference Noise Reduction Filter for Digital Audio at AXPONA 2018

Experience The Mosaic Effect and expand your musical enjoyment at AXPONA 2018! Caprice Audio's new **Mosaic Reference noise reduction filter** will make its world premiere at the show.

The Mosaic Reference is a unique component designed to lower the noise floor of a digital audio system. It uses proprietary Wave Stream Hybrid technology to remove the low-level noise and digital distortion that can disrupt the musical experience, and to optimize component synergy. The Mosaic Reference is a passive component that easily connects to an audio system.

The sonic result: improved musical textures, an expanded soundstage, better transient response and a more natural musical presentation.

Caprice Audio will be demonstrating The Mosaic Effect on reducing digital noise using the Wave Stream Hybrid filtering system. You're invited to come hear the difference for yourself in Booth 235 at AXPONA 2018.

The company will also be exhibiting its Mosaic noise-reduction filter, the Mosaic Stabilizer noise-reduction device and other products. The Mosaic experience awaits you at AXPONA 2018!

WHERE: The Renaissance Schaumburg Hotel and Convention Center, 1551 Thoreau Drive North, Schaumburg, IL 60173, **Booth 235**

WHEN: Please visit during show hours: Friday, April 13 – Sunday, April 15, 2018. You may also schedule an appointment to visit the room.

WHO: Luis Alberto, Caprice Audio owner will be on hand to give you the latest news about the new Mosaic Reference and other Caprice Audio components on exhibit.
